A FRIEND AT COURT
Weiss elected to Board

Colorado Academy's confidence and expanding interest in its alumni association was affirmed recently with the appointment of Association President, Warner Weiss, to a position on the Board of Trustees.

Warner attended the Academy from the first part of 1958 until his graduation with the class of 1961. The summer after his graduation he was married and he attended Rollins College in Winter Park, Florida the following fall. The following year, he transferred to the University of Colorado and remained there until his graduation with a B.S. degree in Aerospace Engineering last year. He is now continuing his graduate work at the University, with the help of a National Science Foundation grant.

This "Pre-Doctoral Traineeship," as the fellowship is called, is granted for up to four years study in the field of Aerospace Engineering. Mr. Weiss is a member of the Sigma Tau and Tau Beta Pi honorary engineering fraternities, and is former President of the American Institute of Aeronautics and Astronautics. He was elected President of the Alumni Association in December of 1964, and resides with his wife and two children at 1175 Albion Road in Boulder, Colorado.

Warner was invited to, and joined, the Board of Trustees last spring and has since been responsible to them for a report of the alumni activities and plans. He has not as yet been assigned any further committee posts. His invitation to join the Board was described as a first step in the direction of further involvement by the alumni in the affairs of the school. It is the feeling of the Board that in the hands of the alumni, lie the keys to much of the future of the Academy and that only through their support and interest will it continue to grow, both physically and educationally, as it has in the past.

PRESIDENT'S NOTES

Dear Alumnus:

In my first official statement, I would like to welcome the recent Colorado Academy graduates to the Alumni Association and wish them luck in future endeavors. My most sincere congratulations are extended for successfully completing this very important first phase of your education.

The Alumni Quarterly is the Alumni Association's first definite attempt to maintain contact among graduates of CA on a regular basis. This first issue, a fine one, is due to the efforts of Garven Dalglish and John Sullivan who spent long, tiring hours over a typewriter or a telephone. Without them, the publication of the Quarterly would have been impossible. The members of the Executive Council need every member's cooperation in continuing the development of the bulletin and other projects. If possible, we would appreciate prompt response to all information requests and your assistance in forwarding news about any alumnus. If you know the whereabouts of any alumnus who is not receiving correspondence, please either have him mail his address, or do it yourself. This is particularly pertinent to the older members of the association that have lost contact with the school.

It is vital that every member of the Association look toward continued support of his school. Without this unity, our opportunities for effectiveness are limited. So far, the support has not reached earth-shaking proportions. Response to letters and inquiries has not been what it could be, and the attendance at the general meeting last December was far from representative in relation to the size of the Association. Perhaps the publication of the Quarterly will be illustrative of our desire to incite your interest and arouse your support.

If you have any comments or suggestions, please do not hesitate to contact me.

L. Warner Weiss
